### **Capacity Attendance Expected for the NAESCO 9th Annual Federal Energy Efficiency Market Workshop in Washington DC**

The National Association of Energy Service Companies (NAESCO) is pleased to announce a capacity audience is expected for its upcoming 9th Annual Federal Energy Efficiency Market Workshop to be held in Washington, DC on March 18, 2014.

The workshop, entitled “***Meeting Enhanced Energy Consumption Reduction and Performance Objectives at Federal Facilities through Strategic Use of ESPCs and UESCs***”, is attended by federal facility, energy program, and contracting managers as well as ESCOs, energy efficiency vendors, and financial institutions all of whom play a key role in generating energy efficiency investment at federal facilities.

The keynote speaker is the Honorable Branko Terzic, Executive Director of the Deloitte Center for Energy Solutions and the Regulatory Policy Leader in Energy & Resources for Deloitte Services LP. A former Chairman, CEO and President of Yankee Energy System, he previously served as a Commissioner on the Federal Energy Regulatory Commission and the State of Wisconsin Public Service Commission.

NAESCO is also pleased to welcome the following speakers who will join industry representatives in a series of panels and roundtables throughout the workshop:

- **Jake Oster**, Deputy Chief of Staff and Legislative Director, Office of Congressman Peter Welch (D, At Large, VT)
- **Tim Unruh**, Program Manager, Federal Energy Management Program, U.S. Department of Energy
- **Richard Kidd**, Deputy Assistant Secretary for Energy, Department of the Army
- **Capt. Kathryn Donovan**, Assistant Commander for Public Works, Naval Facilities Engineering Command
- **Kevin Kampschroer**, Director, Office of Federal High, Performance Green Buildings, U.S. General Services Administration
- **John Shonder**, Program Manager for FEMP, Oak Ridge National Laboratory
- **Kyle Danish**, Partner, VanNess Feldman

- **Jeff Duncan**, former Chief of Staff for Congressman (now Senator) Ed Markey
- **Phil Coleman**, Program Manager, Lawrence Berkeley National Laboratory
- **Bob Slattery**, Research Analyst, Oak Ridge National Laboratory
- **Phil Coleman**, Program Manager, Lawrence Berkeley National Laboratory
- **Donald Gilligan**, President, NAESCO

Terry E. Singer, Executive Director of NAESCO said “Attendance at the Federal Energy Efficiency Workshop has been at capacity every year, evidence of strong, continued interest in pursuing energy efficiency savings in federal facilities on the part of the federal government policy and program managers as well as the ESCO industry.” She went on to say “Presented by a diverse and talented roster of speakers, the program’s focus on overcoming remaining ESPC bottlenecks and maneuvering effectively in a changing political and economic environment is particularly timely for leaders in both the public and private sectors who are working on reducing energy consumption at Federal facilities.”

Since 1998, 300 U.S. Department of Energy’s energy savings performance contracts (ESPC) projects have been awarded and more than \$3.08 billion invested in Federal energy efficiency and renewable energy improvements. The results add up to approximately 371 trillion Btu in life cycle energy savings and \$7.6 billion in cumulative energy cost savings for the Federal Government.

## ABOUT NAESCO

The National Association of Energy Service Companies is a national trade association promoting the benefits of the widespread use of energy efficiency for more than 30 years. NAESCO’s current membership of 90 organizations includes firms involved in the design, manufacture, financing and installation of energy efficiency and renewable energy equipment and the provision of energy efficiency and renewable energy services in the private and public sectors. NAESCO members will deliver about \$6 billion of energy efficiency, renewable energy and distributed generation projects this year. Since 1990, ESCOs have delivered:

- \$45B in projects
- \$50B savings – guaranteed and verified
- 425,000 person-years of direct employment
- \$30 billion of infrastructure improvements
- 470 million tons of CO2 savings at no additional cost
