McClure Company Named One of the “Best Places to Work in PA” for the 10th time

McClure Company Recognized in Large Company Category for Outstanding Employee Satisfaction

HARRISBURG, PA – December 4, 2017 – McClure Company, the largest integrated energy, engineering and performance contractor in the state of Pennsylvania, today announced that it has been named to Pennsylvania’s list of the 100 Best Places to Work, which recognizes companies with exceptional workplace cultures. Appearing on the list for the 10th time, McClure Company was ranked no. 7 on the list, which is based on anonymous employee feedback.

McClure Company understands that a strong corporate culture serves as the foundation for the company's success and as a result the company needs to recruit, reward, and retain the very best people. To do this means fostering an employee-first culture where people are valued, heard, inspired, encouraged to have fun, and most importantly, committed to customer satisfaction.

"We've long held the belief that a talented, happy, motivated workforce will do great things for customers," said Chip Brown, President. "We continue to see the competitive differentiator for McClure Company is our employee-first focus.

Methodology

To identify the 100 Best Companies to Work For, each year Best Places to Work partners with Team Pennsylvania Foundation, The Department of Community & Economic Development and the Central Penn Business Journal to conduct the most extensive employee survey in the state. Three quarters of a company's survey score is based on the results of the Employee Survey, which is sent to a random sample of employees. This survey asks questions related to employees' attitudes about management's credibility, overall job satisfaction and camaraderie. The other quarter is based on responses to the Employer Questionnaire, which includes detailed questions about pay and benefit programs and a series of open-ended questions about hiring practices, methods of internal communication, training, recognition programs and diversity efforts.
